

# WATCH A NEW WAY OF LIFE.

HOME AUTOMATION  
**QUIIQ**

**NEW**   
**VISTA**  
INTERFACE

## INTRODUCING QUIIQ

QuiIQ is a home automation software bundle that gives you a simple, yet powerful control of home divisions, environments, routines and devices.

QuiIQ is a brand new way to deliver high performance at your home, allowing you to discover a single and unified world of integrated features delivered from both digital entertainment and home control systems.

QuiIQ works on top of a Microsoft® Windows® Media Center platform and is built with a high intuitive user-oriented interface.

QuiIQ gives you total flexibility and a do-it-yourself configuration interface, allowing you to mold this new sphere of technology to your digital lifestyle.

QuiIQ is a plug-and-play bundle fully functional with any DOMOTIC protocol and completely compatible with any available DOMOTIC installation.

using a Laptop

QUIIQ UMPC CLIENT  
using a QUIIQ Touch Screen

QUIIQ SERVER  
using a QUIIQ HFX MEDIA CENTER PC

QUIIQ UMPC CLIENT  
using a Ultra Mobile PC

QUIIQ EXTENDER  
using a XBOX 360®

# CONTROL FEATURES

## DIVISIONS USER DEFINED FLOORS AND ROOMS

Create your own divisions to easily represent your house and the way you manage your rooms. You can distribute all your devices, environments, routines and cameras by different rooms and manage them separately.

## LIGHTING DIMMERS AND FLUORESCENT LIGHTS

Control all your lighting circuits in the interior or outside the house. Dimm the lights using just one button of your remote or just click in your touch screen. Add light actions to your everyday routines and to your personal environments.

## APPLIANCES ON/OFF, SHADES AND IRRIGATION

You can simply apply on and off, up and down commands through a single button click. You can also schedule and apply duration and sensor dependencies to appliance actions.

## CLIMATE THERMOSTAT, AIR CONDITIONER, HEATER AND FAN

Control all your climate circuits in the interior and outside the house. Create your own routines depending on temperature triggers.

## SENSORS BRIGHTNESS, MOVEMENT, SMOKE, TEMPERATURE AND WATER

Manage your sensors and include them in your everyday routines to enhance your system security and liability.

## SECURITY ALARM, ZONES AND CAMERAS

Arm and disarm your alarm from your TV or other access point. Open and close zones for partial or total control of the alarm system. View and manage your cameras and your DVR by just using your remote.

## ENVIRONMENTS USER DEFINED TASK SEQUENCES

Define your own environments and give your house new atmospheres and the feelings of your choice. Create scenarios with lights, shades, climate and security devices and activate them whenever you need.

## ROUTINES USER DEFINED SCHEDULES

Reduce your daily repetitive activities creating and managing simple routines. Add tasks and manage triggers with a simple and intuitive interface.

# PRODUCT ARCHITECTURE

**QUIIQ INTERFACE LAYER**  
QuiiQ is prepared to function in the most recent Microsoft® operative systems (Windows® XP, Windows® XP MEDIA CENTER EDITION 2005 and Windows® VISTA). QUIIQ INTERFACE LAYER takes the most from the functionalities of each one of the visualization systems and navigation styles.

**QUIIQ MANAGER**  
Using the most advanced technologies in active security, through a physical token and a dynamic licensing system, QUIIQ MANAGER guarantees the consistency and the protection in its use.

## QUIIQ SERVER

QUIIQ SERVER manages all the activity of the system as well as the real-time synchronization between QuiiQ and the physical devices attached to the domotic circuit.

## QUIIQ DOMOTIC LAYER

QuiiQ is prepared to function with several domotic protocols, taking the best of each protocol's specifications, guaranteeing the reliability between the universes of software and domotics.

**QUIIQ MCE CLIENT** (integrated with Windows® XP Media Center 2005)  
Explore the best functionalities of the automation world within the interface of Windows® Media Center and enjoy the power of a totally integrated system.

**QUIIQ Ultra Mobile PC CLIENT** (integrated with the Windows® tablet PC or VISTA)  
QUIIQ UMPC CLIENT allows you to accede remotely through a wireless network to all the functionalities of QuiiQ.

**QUIIQ WEB CLIENT** (remote access through the Internet)  
Control the house from the office or from abroad using QUIIQ WEB CLIENT and ensure all protection and security in the access.

**QUIIQ XP CLIENT** (remote access through a local network)  
Take more advantage of your computer or laptop by installing the QUIIQ XP CLIENT on every PC.

**QUIIQ VISTA CLIENT** (integrated with Windows® VISTA)  
Explore the most advanced technologies in human interaction and navigation delivered by the recent Microsoft® Windows® VISTA Operating System.
